

LenTrust PRD Summary

Product Overview

LenTrust is a peer-to-peer lending accountability PWA that facilitates confident money lending and borrowing through:

Digital contracts with clear terms

Payment proof upload and validation

Reliability Stars (Trust Score) system

Mobile-first PWA experience

Core Goals

Digital Contract Management - Create, accept, reject, and track loan contracts

Payment Proof System - Upload and validate payment screenshots for disbursal and settlement

Trust & Accountability - Reliability Stars based on repayment history

Mobile-First PWA - App-like experience with offline support

Privacy Controls - Reliability scores visible only to lenders

Data Persistence - LocalStorage with seeded demo data

Key Features

Contract Lifecycle: REQUESTED → PENDING_DISBURSAL → ACTIVE → PENDING_SETTLEMENT → SETTLED

Payment Proof Workflow: Upload screenshots, validate receipts, confirm transactions

Extension Management: Up to 3 extensions per contract with final extension alerts

Review System: Rate borrowers, calculate reliability scores, pin negative reviews

Profile Management: Separate borrower/lender profiles with appropriate visibility

PWA Features: Manifest, service worker, mobile-first design, app-like experience

User Flow

Borrower creates loan request → Lender reviews with reliability score

Lender accepts → uploads payment proof → Borrower validates receipt

Contract becomes active → Borrower can request extensions (max 3)

Borrower uploads settlement proof → Lender validates and confirms

Lender rates and reviews → Reliability Stars updated

Validation Criteria

Minimum amount: ₹100

Due date: 48 hours to 90 days

Phone format: +91 Indian format

Max 3 extensions per contract

Reliability scores visible only to lenders

Data persistence via LocalStorage

Tech Stack

Frontend: React, TypeScript, Vite, TailwindCSS, shadcn/ui

State: Zustand, TanStack Query
